# **Technical Information**

Water-based cleaning medium for the removal of fluxes from solder pallets and condensation traps

ATRON<sup>®</sup> SP 200 is an aqueous-alkaline surfactant cleaner, specifically developed to remove baked-on fluxes from solder pallets and condensation traps. ATRON<sup>®</sup> SP 200 can also be used for the removal of unsoldered solder pastes from SMT stencils. The cleaner is suitable for air assisted, ultrasonic and spray-in-air cleaning equipment.

## Areas of application – Condensation traps / Solder frame / Stencil Cleaning

#### Advantages compared to other cleaners

- Simple, easy-to-use handling.
- 3 to 10 times longer bath life than traditional surfactant cleaners. The reduced number of bath changes results in a lower volume of cleaning agent disposal. Thereby, process costs are reduced. This was proven by several customer cases.
- Excellent compatibility with aluminum and epoxy surfaces.
- No build-up of organics in the rinsing section.
- Approved by leading international cleaning equipment and stencil manufacturers.
- ATRON<sup>®</sup> SP 200 is also suitable for cleaning conveyor fingers or the manual removal of extremely baked-on flux residues in solder ovens and similar applications.

## **Process Steps**

| Cleaning Process      | 1. Cleaning               | 2. Rinsing                            | 3. Drying                 |
|-----------------------|---------------------------|---------------------------------------|---------------------------|
| Air assisted cleaning | ATRON® SP 200             | Recommended: DI-water or<br>tap water | Hot or<br>circulating air |
| Ultrasonic            | ATRON <sup>®</sup> SP 200 | Recommended: DI-water or<br>tap water | Hot or<br>circulating air |
| Spray-in-air          | ATRON <sup>®</sup> SP 200 | DI-water or tap water                 | Hot or<br>circulating air |

| * DI state of the l       |                                |                    |

\* Please note that the information above represents ATRON® SP 200 at 15 % concentration.

## **Product Features & Cleaning Standards**

100% compliance with EU guidelines (RoHS 1, 2 & 3, WEEE)

solder pastes

Extensively tested and suitable for cleaning lead-free

Product is free of any critical substances according to SIN & SVHC lists

#### Environmental, health & safety regulations

- ATRON<sup>®</sup> SP 200 is water-based and biodegradable.
- ATRON<sup>®</sup> SP 200 is formulated free of any halogenated compounds and therefore environmentally friendly.
- Refer to the SDS for specific handling precautions and instructions.
- This product is non-hazardous material.

## Availability & Storage

| 1 Liter   | ~ |
|-----------|---|
| 5 Liter   | ~ |
| 25 Liter  | ~ |
| 200 Liter | ~ |

- Available as concentrate
- Store ATRON<sup>®</sup> SP 200 in the original container at a temperature between 5 30°C / 41 86°F.
  - The product has a minimum shelf life of 5 years in factory sealed containers.

#### **Available Process Optimization – Products**

To ensure a stable running cleaning process, it is important to monitor cleaning agent concentration. For ATRON<sup>®</sup> SP 200 following process support product is available:

#### Concentration measurement:

 ZESTRON<sup>®</sup> Easy Bath Control Kit a manual test method for fast and reliable checks of cleaning agent concentration.
